

One day Teachers' Workshop on Engaging and Encouraging Children to pay attention and focus on learning

Objectives:

- To enhance the capacity of the focal teachers on engaging and encouraging the students in their learning.
- Share the progress report of ESP 2021 and planning of 2022.

"Today's session is one of the needed issues that teachers need to know. Due to covid-19 and lockdown, many students are forced to stay at home and continue their studies online and get struggle to concentrate on their learning. Still, we saw such problems in school. So from today's session, I came to know how we can make our teaching more interesting so that we can attract the students and increased their attention to studies. So I will practice this learning in my class and will also share it with my colleagues. So thank Loo Niva for conducting such a needed program."

Lalitpur, with the support of Interpedia Finland Loo Niva, conducted one day workshop for focal teachers of ESP project schools from Lalitpur and Kathmandu. The program was conducted on 18 March 2022 at hotel grace Bhaisepati, Lalitpur. The main objective of the program was to capacities the teachers on how we can engage and encourage the students in their learning.

Loo Niva did an online survey among the focal teachers. After a survey, many teachers discourse that after covid-19 and lockdown many children are forced to be at home and start online classes for that reason many students get the problem to concentrate on their studies.

Ms. Sabita Shrestha (Psychosocial Counselor) facilitated the program. 18 focal teachers (F-6, M-12) participated in the program. It covered the following subject.

- Attention
- Board types of attention
- Attention span
- Average attention span of a child
- How we need to train our mind
- Maintaining attention
- Exercise that will strengthen the attention
- Some group discussion and exercise
